COMPANY PROFILE

BioConnection is a contract services and manufacturing organization for the development and production (Filling and Freeze drying) of injectable (bio)pharmaceutical products. We have access to various GMP manufacturing facilities across Europe that are all in compliance with the guidelines issued by the EMA and/or the US-FDA. The cornerstones of our CMC services are: Drug Product development, Fill & Finish, Freeze-drying and Clinical Trial Material services.

We have the means and expertise to bring your invention from the lab bench to the clinic and/or to the market. Due to our unique setup and best-in-class European network of development and manufacturing partners we are able to provide you with tailor made solutions with unmatched flexibility. Our approach ensures a seamless development and manufacturing chain for your product.
