Core business

BioConnection is a CMO with a solid track record in pharmaceutical development and GMP manufacturing of sterile drug products in vials and syringes.

Tailor-made solutions

BioConnection is very well positioned to support [bio] pharmaceutical companies in bringing their inventions from the lab bench to the clinic and to the market. We have more than 15 years of experience and we serve customers worldwide. We value satisfied customers, and it is our spirit to deliver milestones on time and within budget.

Aseptic fill & finish

We deliver from 4 aseptic production lines including 2 freeze dryers of 3 m² and 10.2 m². We offer a broad range of batch sizes to match volumes that are required for personalized medications, clinical trial programs and commercial purposes.

Service packages

In addition to our aseptic and GMP compliant fill & finish services we offer:

- Process and formulation development
- Lyo-cycle development and/ or optimization
- Freeze-drying
- Analytical development & validation
- Technical transfer
- Scale-up
- Process validation
- Stability studies
- Label & pack (including serialization)
- Final batch certification to clinic or market

Quality

Our state-of-the-art GMP facility has an excellent manufacturing and regulatory track record including EMA and US-FDA.

Let's connect!

Delivering from 4 aseptic filling lines

- EMA and US-FDA certified facility
- Clinical and commercial licensed
- From manual fill up to multiple millions of vials/year
- In volumes that match your requirements

Small-scale filling line + 3 m² freeze dryer

Scale: 2 – 50L
Indicative maximum batch sizes [*]

VIAL SIZE	LIQUID PRODUCT	LYOPHILIZED PRODUCT
2 RDIN	17,200	11,000
6 RDIN	12,500	5,700
10 RDIN	10,000	4,800
20 RDIN	5,000	3,000
25 RDIN	4,000	3,000
50 RDIN	2,000	1,400

[*] Actual batch size depends on requested scale of production and filling volume/vial. Examples are based on a 50% filling volume/vial [e.g. 25 ml fill in a 50 RDIN vial, etc.]

Large-scale filling line + 10.2 m² freeze dryer

Scale: up to 500L+
Indicative maximum batch sizes [*]

VIAL SIZE	LIQUID PRODUCT	LYOPHILIZED PRODUCT
2 RDIN	57,000 – 150,000	44,900
6 RDIN	57,000 – 150,000	23,200
10 RDIN	50,000 – 150,000	19,600
20 RDIN	25,000 – 100,000	12,600
25 RDIN	20,000 – 80,000	12,600
50 RDIN	10,000 – 40,000	6,800

[*] Actual batch size depends on requested scale of production and filling volume/vial. Examples are based on a 50% filling volume/vial [e.g. 25 ml fill in a 50 RDIN vial, etc.]

Syringe filling line

- Scale: 2 – 50L
- Speed: 5,000 syringes/hour
- Formats: 0.5 ml up to 10 ml syringes

Manual filling line

- Scale: up to 1.000 units/ batch [standard vials]
- Assembly projects possible
- Personalized medications
- Standard vial formats, bottles, eye drops, nasal sprays, etc.
